

had now largely disappeared. Both at this time and at the earlier visit on June 4 no examples of the *Peridermium* were found more than 3 dm. above the ground, and the infection was mostly on very small trees, or on small branches near the ground.

The three previous collections of this *Peridermium* were also on small branches. Two of them were made by Mr. J. B. Ellis at Newfield, N. J., one in 1882 on *Pinus virginiana* Mill., distributed in his N. Am. Fungi no. 1021, and the other in 1890 on *P. rigida* Mill. The third collection has little import, as it was made in the Missouri Botanical Garden, and if it really belongs to this species, was doubtless brought to the Garden on plants obtained in the eastern states. The rust on *Comptonia* is common in the region about Newfield, N. J.

Of the common forms of *Aecidium* and *Roestelia* many have been definitely associated with their corresponding telial forms. But of the twenty-seven known species of *Peridermium* in North America, which number doubtless represents not more than half the full number that exists, only three have yet been connected by cultures with their telial forms, hence one element of interest in the observations of Dr. Thom. The publication of this note is intended to supply the clue to any one who may be fortunately situated, and inclined to undertake cultures of this rust, which can best be made during the month of May.

THE RECORD OF COLOR VARIETIES OF GRATIOLA AT WESTFIELD, A CLERICAL ERROR.— On page 123 of the current volume of RHODORA it was stated that the white and light yellow forms of *Gratiola aurea* had been found at Westfield, Massachusetts. Miss Emily F. Fletcher has called our attention to the fact that this was probably a clerical error and that the station where the plants were found was in reality Westford, which is in Middlesex County, and not Westfield as stated. Reference to Dame & Collins's Flora of Middlesex County, Massachusetts, shows that Miss Fletcher is quite right and that in fact the station was Westford and not Westfield as quoted through some oversight.—ED.
